to

8/29/2016 0700

	ii.	

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period		8/28/2016	Date To:	8/29/2016
TUI	LEY		Time From:	0700	Time To:	0700
3. Objective(s):						
Management Obje	ctives					
-Establish and mai	ntain safe work prac	tices to minimize threats	to the public an	d emergency per	sonnel.	
-Minimize damage	to structures, privat	e property and other imp	rovements in the	e fire area.		
-Protect natural, cu	ultural, heritage reso	urces and commercial tin	nber values.			
-Foster and mainta	ain relationships with	all tribal and local coope	erators.			
-Provide timely an	d accurate incident i	nformation.				
-Maintain fiscal ac	countability and kee	o costs commensurate w	ith values at risk	ζ.		
Control Objectives	.					
	et.					
-Keep the fire Sou	th of the East Fork o	f Pecwan Creek.				
-Keep the fire Wes	st of Bee Mountain.					
-Keep the fire North	th of the Klamath Ri	ver.				
-Keep the fire Eas	t of the Klamath Riv	er.				
General Situation	nal Awareness:					
Steep and rugged	terrain, critically dry	and receptive fuel beds.				
5. Site Safety Pla	n Required?	Yes No _X_

INCIDENT Weather Forecast

FORECAST NO:

NAME OF FIRE: Tulley Fire

PREDICTION FOR: Sunday Day/night SHIFT

UNIT: CA-HUU

SHIFT DATE:

Aug 28 0700 – Aug 29 0700

2000 August 27, 2016

SIGNED:

Mike Smith

TIME AND DATE

FORECAST ISSUED:

Incident Meteorologist

WEATHER DISCUSSION: Weak high pressure will be sliding over the north state today. This should keep the marine influence on the fire about the same as Saturday and overall, only minor changes to the more moderate weather pattern are expected. The marine layer should be deep enough again for some morning coastal clouds to reach the fire area but these will clear by mid-morning. Gradient wind flow will remain below 10 mph so slope winds on the fire will remain terrain dominated. An upper low will approach the coast beginning Monday morning. This may increase the marine layer some and increase onshore flow so a greater marine influence is likely. Much of the fire area could see coastal stratus in the morning hours. Monday afternoon should see significantly cooler temperatures and higher humidity. Ridgetop winds could see a slight boost as well but the lower elevations of the fire are still likely to be unaffected. A series of small low pressure troughs will move through the north state through the coming week continuing moderate conditions and continued onshore flow. A slight threat of precipitation still exists over the fire area

WEATHER FORECAST:

WEATHER: Scattered marine clouds in the morning hours clearing by mid morning. Then Mostly Sunny.

TEMPERATURES: High temperatures 81 to 86.

HUMIDITY: Minimum humidity 30-38%.

20 FT WINDS:

late in the week.

RIDGETOP - (1000-2000 feet above the fire) Light and variable to 4 mph in the morning hours becoming southwest to west after 1000, 4-8 mph with afternoon gusts to 17 mph.

SLOPE/VALLEY - Downslope to downcanyon 1-4 mph through about 1000. Then upslope to upcanyon 2-5 gusts to 10 mph. Strongest winds in the late afternoon.

STABILITY/INVERSION: Fairly stable conditions. Marine layer about 2000 feet.

OUTLOOK FOR Sunday Night: Mostly clear becoming partly to mostly cloudy with marine clouds after about midnight. Minimum temperatures on the fire 50 to 55. Good RH recovery at or above 90% canyon bottoms and 70 to 80% upper slopes. Winds on the slopes, upslope to upcanyon 2-5 gusts to 10 mph. decreasing after 2100 to less than 4 mph but remaining mainly upcanyon through the night. Ridgetops above the fire... southwest to west 4-8 mph gusts to 17 mph evening hours becoming light and variable after about 2200.

OUTLOOK FOR Monday: Partly to mostly cloudy in the morning with marine stratus. Mostly Sunny after about 1100. Maximum temperatures 78-85. Minimum humidity 35-45%. Slope winds variable mainly upcanyon 1-4 mph becoming upslope to upcanyon 4-7 gusts to 12 mph after about 1000. Ridge winds above the fire, light and variable in the morning becoming southwest to west 6-12 mph with gusts to 18 mph in the afternoon.

EXTENDED FORECAST: Tuesday and Wednesday. Fair skies except coastal stratus during the night and morning hours. A little cooler each day with highs in the mid 70s to lower 80s. Minimum afternoon humidity 35-45% or higher. Breezy northwest winds in the afternoons on the ridgetops 6-12 mph with gusts to 18 mph each day. Mainly terrain driven winds on the slopes.

EXTRA INFORMATION:

Sunrise Sunday 6:38 Sunset Sunday 7:54

SAFETY MESSAG

Fatigue (n)

- 1. inability to respond to situation: the temporary inability of somebody to respond to a situation as a result of overexposure or excessive activity.
 - Steep winding roads are throughout the incident. Slow down when driving on dusty roads and blind curves. Drive defensively with headlights on.
 - Watch for signs of fatigue in yourself and eachother Take breaks early and often !!!
 - HEADS UP!!! Look out for falling rocks and boulders.
 - Beware of stump-holes, steep slopes, trip hazards, and loose footing.
 - Stay hydrated!!! Time to think = time to drink. Document rest and hydration on ICS 214.
 - As the incident comes to a close, keep your safety and the safety of your crews as a top priority.
 - Expect an increased in civilian traffic on the roadways.
 - Remain mindful of what is going on around you! LCES!
 - HEADS UP!!! Lookout for SNAGS when working around areas with burned trees.

Mop Up and Patrol Operations:

Maintain your Situational Awareness Observe for changes in the weather PPE shall be utilized during operations Understand your assignment Pace the crew for the entire day

CALFIRE INCIDENT MANAGEMENT TEAM 3 SOF1 David Sargenti

INCIDENT RISK ANALYSIS ICS 215A

Branch	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES/SNAG HAZARDS	 Follow Hazard Tree Safety Guidelines (IRPG p. 22). Many of the trees within the fire area and along roadways are stressed due to prolonged drought conditions and extended burn times.
ALL	DRIVING HAZARDS	 Drive defensively! Expect the unexpected. Watch for distracted drivers. Increase following distances. Slow down. Watch for debris on the roadways.
ALL	FATIGUE	 Be alert for signs of fatigue and take breaks as necessary. Adhere to the 2 to 1 work rest cycle. Monitor incoming resources for level of fatigue.
ALL	PERSONAL SAFETY	 All personnel are responsible for their personal safety. Immediately report any suspicious activity to your supervisor.
ALL	HYDRATION	 Drinking water before, during and after each shift. Be alert for signs of heat stress in yourself and others.
ALL	HEAT RELATED ILLNESS	 Review "Specific Treatments" section of the IRPG (pg 103) for heat illnesses signs and treatment. Report any and all injuries to your supervisor.
ALL	FIRE WEATHER	 Ensure LCES in place prior to engagement (IRPG p. 7). Be thoroughly familiar with weather predications and monitor conditions on the ground for changes. Watch for second burn period around 0000-0300.
ALL	ACCOUNTABILITY	Be sure to check in with Branch/Division when working in their area of responsibility.
ALL	DEMOB	 Monitor all drivers for fatigue. Be prepared to go to the next incident. Ensure that personal items and work related equipment are secure.
ALL	ROLLING MATERIAL	 With the steep terrain watch for rolling material when personnel are working around/above you. Call out rolling material.
ALL	COMMUNICATIONS	Steep terrain may limit communications.Use human repeaters as needed.
ALL	BRIEFINGS	• Make sure everyone gets a briefing on the plan for the day (inside rear cover IRPG).
A/C ALL	AIRCRAFT AWARENESS MOP UP	 When working with aircraft notify them of any known utility lines. Do not get complacent during mop up. Wear ALL appropriate safety gear as required.
CAMP	TSUNAMI EVACUATION	 Base camp is within the County's Tsunami Zone. The potential for inundation is present if a tsunami was to occur. Evacuation route is east up Bald Hills Road.

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - Line EMT / PM
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic
- Communications will switch all emergency traffic to **CALCORD**
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
 - Dispatch air/ground ambulance to as appropriate.
 - If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
 - Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

INJURY REPORTING PROCEDURES

NATURE OF INJURY
LOCATION OF PATIENT
TRANSPORTATION REQUESTED BY:AIR GROUND
POINT OF PICKUP
LAT LONG
PATIENT UNIT ID

AGE
SEX: MALEFEMALE

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

Medical Unit (951) 264-9340

TRAINING MESSAGE

The Incident Training Specialist is located in the Check-In Tent; Hours of operation are 0600 to 2100 hours. If you are a trainee or have a trainee working with you please stop by to register your training assignment. It is very important that you register early; once you start the demobilization process your records will be locked.

Focus on:

- -Reviewing you position task book for additional opertunities.
- -Take advantage of opportunities during the remainder of your assignment to include simulation exercises where appropriate.
- -Completing documentation promptly while the information is fresh.

You may also contact us by phone at:

Jim Mobley TNSP

530-941-2129

Matt Seybert TNSP (T)

714-875-4040

Thank you for helping us to help you!!!

DEMOBILIZATION MESSAGE Tulley Incident CA-HUU-006956

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designate time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There are other incidents in the state that are in need of resources. There is a strong possibility that many of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered during Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found <a href="https://example.com/here/news/media-new

409.5

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy <u>here</u>.

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE - The Information Section can assist you with sending and receiving mail.

TULLEY INCIDENT FINANCE SECTION MESSAGE

There is a computer dedicated for E-Pay use set up in the Finance Section.

There are federal timekeepers available for all federal employees and federal contract resources.

DIVS / LINE SUPERVISORS: Please make sure hired equipment shift tickets are completed for all private vendors and dropped off in the Time Unit by line supervisors only (DIVS, STAM, STEN, etc.) Shift Ticket Examples are included in this IAP.

PRIVATE VENDORS: Please take copies of your contracts to the Time Unit as soon as possible.

Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor.

Please complete water use forms included in the IAP. Only draw water from identified and approved sources. Turn in these forms to Comp/Claims.

Any "off site" feeding charged to the incident must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.

IMT 1 version 1

FIRE SUPPRESSION REPAIR
TULLEY INCIDENT: CAHUU-006956

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Group shall be turned over to the local Unit or the Comp/ Claims Unit.

Start Early!

Fire Suppression Repair needs should be reported as soon as discovered. To the extent feasible, repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at drop points. Police your areas.

Repair Site Inventory:

Field Observers and Fire Suppression Repair Group resources will be traveling throughout the fire looking for repair needs. All fire line resources are asked to contribute any known issues. The Suppression Repair Group will then evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

Infrastructure Damage:

Report the location and type of suppression damage to infrastructure. Common examples of such features include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Miscellaneous damage to residential property

Natural Resource Damage:

This category represents repairing existing problems <u>caused by fire suppression activities</u> (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars on unsurfaced roads.
- Construct waterbars on all dozer and, where needed, hand lines, according to the following Specifications: Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto least erodible material possible.

Line or Road Gradient (%)	0-25%	>26
Waterbreak Spacing	100	50'

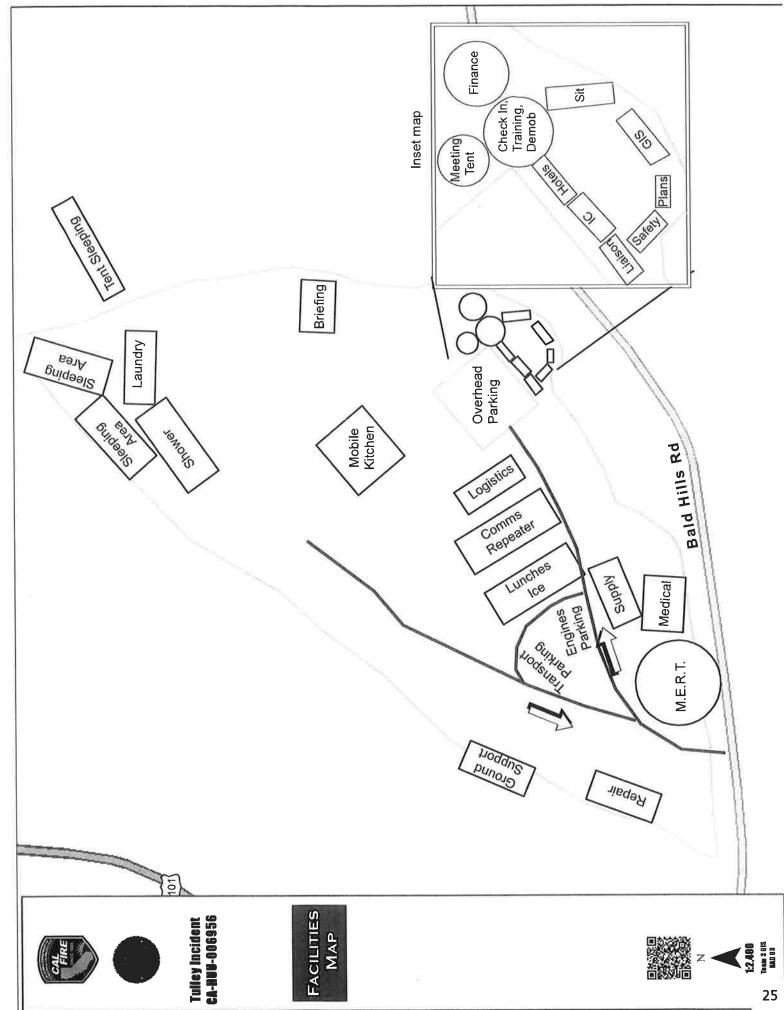

- Remove all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.

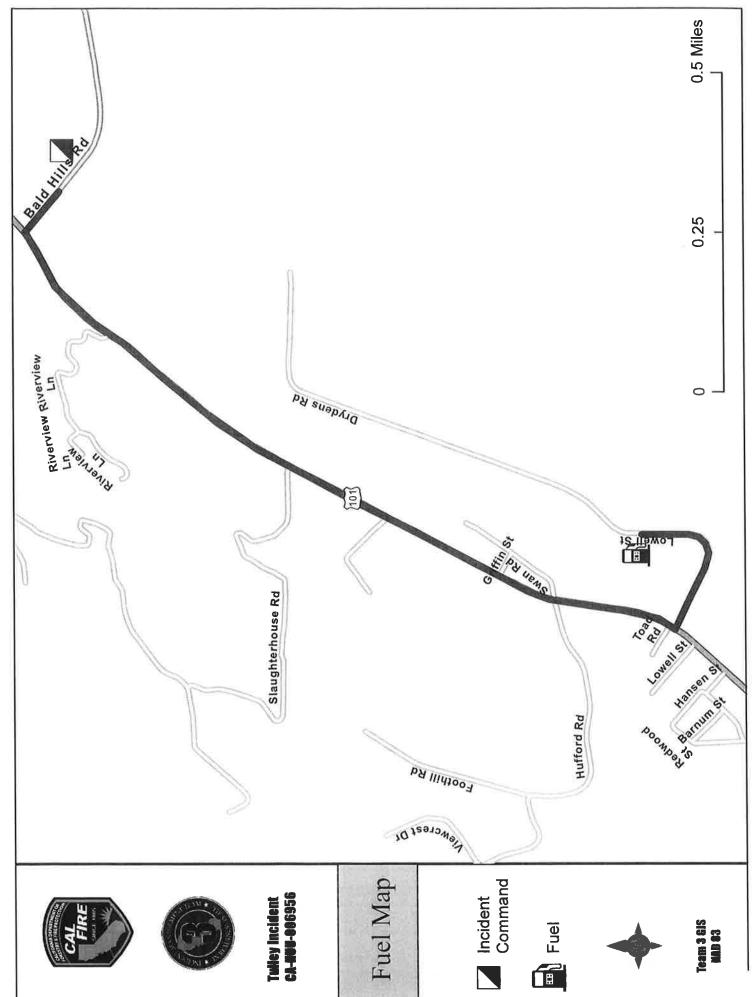

Cultural Site Damage:

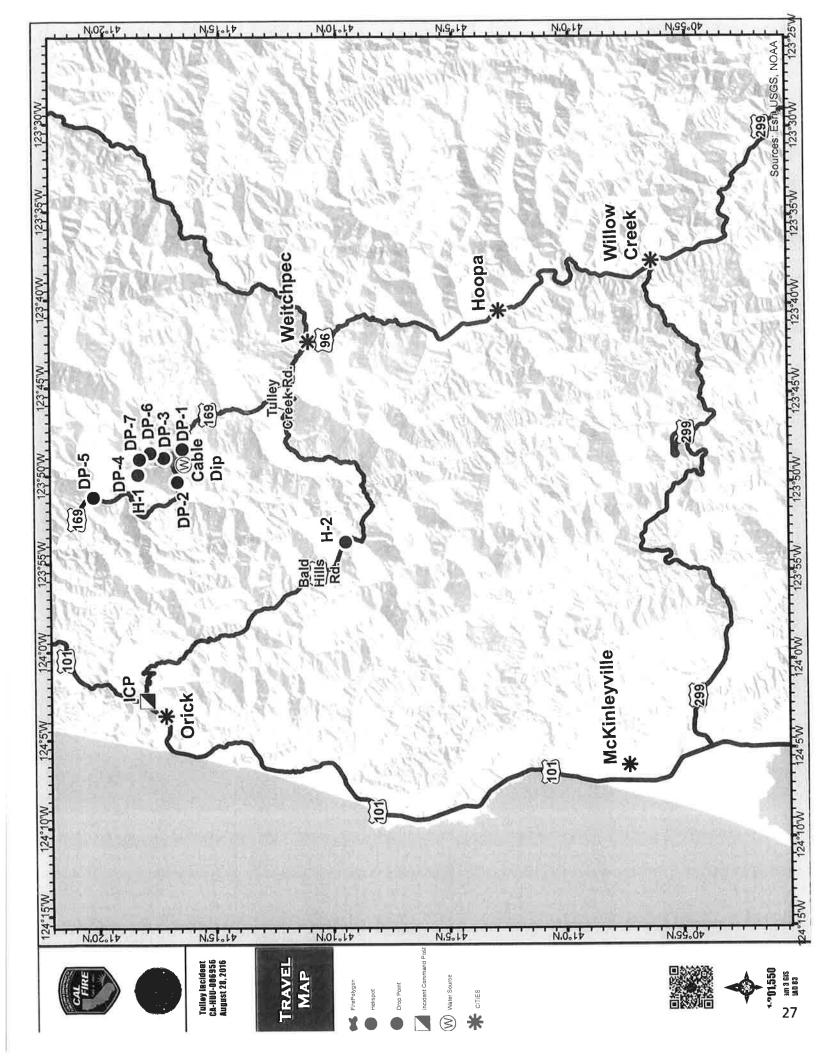

Report any disturbance to a known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. This includes any air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.
